W : Extracellular structures
O : Posttranslational modification, protein turnover, chaperones
F : Nucleotide transport and metabolism
H : Coenzyme transport and metabolism
J : Translation, ribosomal structure and biogenesis
Z : Cytoskeleton
L : Replication, recombination and repair
P : Inorganic ion transport and metabolism
C : Energy production and conversion
S : Function unknown
E : Amino acid transport and metabolism
M : Cell wall/membrane/envelope biogenesis
B : Chromatin structure and dynamics
U : Intracellular trafficking, secretion, and vesicular transport
T : Signal transduction mechanisms
D : Cell cycle control, cell division, chromosome partitioning
I : Lipid transport and metabolism
A : RNA processing and modification
G : Carbohydrate transport and metabolism
N : Cell motility
K : Transcription
V : Defense mechanisms
Q : Secondary metabolites biosynthesis, transport and catabolism
