U : Intracellular trafficking, secretion, and vesicular transport
V : Defense mechanisms
G : Carbohydrate transport and metabolism
K : Transcription
B : Chromatin structure and dynamics
T : Signal transduction mechanisms
I : Lipid transport and metabolism
F : Nucleotide transport and metabolism
J : Translation, ribosomal structure and biogenesis
S : Function unknown
D : Cell cycle control, cell division, chromosome partitioning
P : Inorganic ion transport and metabolism
L : Replication, recombination and repair
Q : Secondary metabolites biosynthesis, transport and catabolism
Z : Cytoskeleton
H : Coenzyme transport and metabolism
C : Energy production and conversion
E : Amino acid transport and metabolism
N : Cell motility
M : Cell wall/membrane/envelope biogenesis
O : Posttranslational modification, protein turnover, chaperones
