Q : Secondary metabolites biosynthesis, transport and catabolism
I : Lipid transport and metabolism
O : Posttranslational modification, protein turnover, chaperones
M : Cell wall/membrane/envelope biogenesis
F : Nucleotide transport and metabolism
D : Cell cycle control, cell division, chromosome partitioning
S : Function unknown
U : Intracellular trafficking, secretion, and vesicular transport
P : Inorganic ion transport and metabolism
N : Cell motility
T : Signal transduction mechanisms
W : Extracellular structures
V : Defense mechanisms
E : Amino acid transport and metabolism
J : Translation, ribosomal structure and biogenesis
L : Replication, recombination and repair
H : Coenzyme transport and metabolism
K : Transcription
G : Carbohydrate transport and metabolism
C : Energy production and conversion
