O : Posttranslational modification, protein turnover, chaperones
T : Signal transduction mechanisms
I : Lipid transport and metabolism
G : Carbohydrate transport and metabolism
M : Cell wall/membrane/envelope biogenesis
E : Amino acid transport and metabolism
U : Intracellular trafficking, secretion, and vesicular transport
B : Chromatin structure and dynamics
J : Translation, ribosomal structure and biogenesis
C : Energy production and conversion
D : Cell cycle control, cell division, chromosome partitioning
Q : Secondary metabolites biosynthesis, transport and catabolism
F : Nucleotide transport and metabolism
Z : Cytoskeleton
H : Coenzyme transport and metabolism
S : Function unknown
P : Inorganic ion transport and metabolism
K : Transcription
N : Cell motility
V : Defense mechanisms
L : Replication, recombination and repair
